

Automatic charger

for machine tools with interpoint operation

● Mechanical engineering

● Realizations

○ Cabling

○ Machines

This loader with drawer concept allows the supply of cylindrical raw material to your machine tool, lathe, cylindrical grinding machine... from a vertical buffer store; for medium and large series work.

Equipped with a part presence detection and a hydraulic actuator, it operates automatically, controlled by your installation.

The thinness of its construction allows the feeding of cylinders with a minimum diameter of 1mm.

A subassembly for fine adjustment of the axis can be proposed as an option according to your needs.

SPECIFICATIONS :

- All cylindrical products $1 < \varnothing < 16\text{mm}$, $30 < \text{length} < 190\text{ mm}$
- Autonomy : 300 pieces in $\varnothing 1\text{mm}$, 20 pieces in $\varnothing 16\text{mm}$
- Stroke, scalable, 350mm
- 1 intermediate pre-loading position, to optimize your cycle time

Reference : 3267
